DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1 through 14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not teach applying adhesive in the form of “a multitude of essentially unbroken lines”; the specification and references to the drawing figures refer to the applied adhesive as beads.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 through 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. By looking at Figures 1 and 1B, it is unclear as to what “multitude of essentially unbroken” lines of adhesive means.

Response to Arguments

5. Applicant's arguments, filed August 24, 2009, with respect to the rejections made under 35 USC 112, 1st paragraph and 112, 2nd paragraph, have been fully considered but they are not persuasive.

Besides Figure 1B showing the multitude of beads, there is no direct reference found in the specification of the dimensions of a "bead of caulk" or a long string of active material. Applicant points to the specification disclosing "endless beads"; however, continuously applying "endless beads" can be interpreted as continuously applying an unlimited amount of beads extruded through a die, and does not necessarily have the geometry of unbroken lines.

Thus the rejection is maintained.

6. Applicant's amendments and arguments, see pages 2 and 3 in the remarks, with respect to the rejections under 35 USC 103(a), have been fully considered, and the rejections have been withdrawn.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
